The fully revised new edition of this textbook presents a well-balanced set of economic development financing tools and techniques focused on our current times of economic austerity. While traditional public sector techniques are

evaluated and refocused, this volume emphasizes the role of the private sector and the increasing need to bring together different techniques and sources to create a workable financial development package. The chapters address critical assessments of various methods as well as practical advice on how to implement these techniques. New chapters on entrepreneurship, the changing nature of the community banking system, and the increasing need for partnerships provides critical insights into the ever-evolving practice of economic development finance.

"This book is an excellent resource for economic development educators, scholars and practitioners alike. It covers a wide range of timely and relevant topics in an accessible way." --Greg Schrock, Portland State University
"This excellent volume provides the most up-to-date research and thinking on the application, as well as the strengths and weaknesses, of the most important tools in contemporary economic development finance. It is essential reading for courses on economic development policy, planning and finance." --John Accordino, Virginia Commonwealth University
"In light of the great recession and its unexpected regional impacts, this timely book reminds us that financial decisions remain at the center of economic development strategies. The authors cover the full range of issues encountered by policy makers, with a valuable historical perspective on the field as well as new ideas. These experts in economic development finance ask critical questions about silver bullet strategies that promise instant results and re-focus our attention on the ED basics: efficiency, equity and accountability." --Susan M. Christopherson, Cornell University
"This volume should be on the shelf of every student and practitioner of economic development. It offers a comprehensive package for urban economic development courses, starting with two introductory chapters that provide an excellent overview of the field. The detailed chapters on specific public, private and hybrid finance mechanisms that follow offer clear explanations and examples of when and why to use them and how to evaluate their effectiveness." --Joan Fitzgerald, Northeastern University
"This second edition of Financing Economic Development in the 21st Century is a welcomed update of an essential resource for students of economic development." --Nancey Green Leigh, Georgia Institute of Technology
