Henning O. Hansen : Food Economics: Industry and Markets (Routledge Textbooks in Environmental and Agricultural Economics) before purchasing it in order to gage whether or not it would be worth my time, and all praised Food Economics: Industry and Markets (Routledge Textbooks in Environmental and Agricultural Economics):

Food and food markets still enjoy a pivotal role in the world economy and the international food industry is moving towards greater consolidation and globalization, with increased vertical integration and changes to market structure. Companies grow bigger in order to obtain economies of scale and issues such as food security, quality, obesity and health are ever important factors. This book describes the link between food markets and food companies from a theoretical and a business economics perspective. The relationships, trends and impacts on the international food market are presented, and the topic is related to actual business conditions. Each chapter is accompanied by questions and assignments designed to help students in their learning.

About the Author Henning Otte Hansen is Senior Advisor in the Institute of Food and Resource Economics/Production and Technology Unit at Copenhagen University, Denmark.
