Global Financial Governance Confronts the Rising Powers addresses the challenge that the rising powers pose for global governance, substantively and institutionally, in the domain of financial and macroeconomic cooperation. It examines the issues that are before the G20 that are of particular concern to these newly influential countries and how international financial institutions and financial standard-setting bodies have responded. With authors who are mainly from the large emerging market countries, the book presents rising power perspectives on financial policies and governance that should be of keen interest to advanced countries, established and evolving institutions, and the G20.
