**H. van Zon, Hans van Zon : Globalized Finance and Varieties of Capitalism (International Political Economy Series)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Globalized Finance and Varieties of Capitalism (International Political Economy Series):

Hans van Zon analyzes the financialization of developed capitalism, and argues that the emergence of finance as a dominant force has contributed to the relative decline of the West. He demonstrates that the neo-liberal model is inherently unstable and undermines capitalist economies, which can only function if they are embedded in institutions that are non- or even pre-capitalist. He shows how a toxic combination of financialization, corporate globalization, and a deregulated and parasitic financial industry have led to structural economic stagnation in both the USA and the greater part of the EU.

From the Back Cover  
Hans van Zon analyzes the financialization of developed capitalism, and argues that the emergence of finance as a dominant force has contributed to the relative decline of the West. He demonstrates that the neo-liberal model is inherently unstable and undermines capitalist economies, which can only function if they are embedded in institutions that are non- or even pre-capitalist. He shows how a toxic combination of financialization, corporate globalization, and a deregulated and parasitic financial industry have led to structural economic stagnation in both the USA and the greater part of the EU.  
About the Author  
Hans van Zon is Professor Emeritus at the University of Sunderland, UK. His publications include *Russia's Development Problem* (2008, Palgrave Macmillan), *The Political Economy of Independent Ukraine* (2000, Palgrave Macmillan), *The Future of Industry in Central and Eastern Europe* (1996), and *Alternative Scenarios for Central Europe* (1994).
