he's on Bloomberg or CNBC. This book provides a whole lot of background information to help people understand why gold is in a secular bull market and how to understand various technical indicators. This is a background book and not, in my opinion, a book to tell the novice how to successfully trade gold-related securities. Weldon does this full-time and few of us will have the time or inclination to perform daily checks on all the indicators that he uses. By the time you finish this book, you'll understand the main point of it, namely, that 99.99% of us should let the professionals do the trading for us. The worst thing that could happen by having professionals manage gold-trading is loss of money (as opposed to loss of both money and time). If this book discourages the reader from trying to make fast money trading gold-related securities, it has done its job. Most of us are better off trying to accumulate some gold to store in a safe deposit box as a form of insurance. Even this is not perfectly safe though because the government in theory could one day confiscate. I think Weldon did a good job educating readers on the technical indicators he uses to advise on gold trading. 0 of 0 people found the following review helpful. A book for a genuine SPREADER !!! By Xi Meng Anyone who rates this book lower than five are doomed to fail in trading, this fellow shows you the approach used in both CC and Moore. Over the history of the Board of Trade, there's only been one group of traders that has consistently made money, and those are spreaders. Think deep, the Boy Wonder was a phenomenal \$preader, so was his Nemesis, Mr. Arthur Cutten. Niederhoffer, Jim Rogers, Soros and Tudor did the same, they spread against anything that is correlated with each other. Why Tom Baldwin and Charlie D. could survive and thrive in the bond pit because they spread against 6J, GC and CL. Richard Dennis used to spread against the beans when buying wheat. But make sure you know how to spread, try to understand the underlying driver like Ray Dalio did, 0 of 0 people found the following review helpful. Five Stars By Joey great BOOK... WELL WORTH THE MONEY

Praise for Gold Trading Boot Camp "If speculate you must, read Weldon first." —James Grant, Editor, Grant's Interest Rate Observer "This book delivers on all of the essential elements of successful financial literature. Weldon provides a compelling context, walks through the metrics that affect the price action, and assimilates the decision-making process in kind. From soup to nuts, this is one of the most comprehensive tutorials I've read on the subject of commodities." —Todd Harrison, founder and CEO, Minyanville Publishing and Multimedia, LLC "The gold price is rising in today's turbulent financial times. Preparation and knowledge are essential to profit from higher prices, and this book provides everything you need to take advantage of the trading opportunities that lie ahead." —James Turk, founder, GoldMoney.com "This book, with its insights into the current investment climate coincides with what many feel is a new bull market in gold. There is no 'one-size-fits-all' investment approach, but every investor who applies such preparation and rigor as Greg outlines will certainly have increased returns with fewer losses. It should be on every investor's bookshelf, handy for reference, and re-read every year. Greg puts paid to the notion of random walk!" —Kim Evans, CEO, Global Building and Supply

From the Inside Flap Gregory Weldon, a veteran commodities speculator and expert on the subject, has mastered the gold-trading rules through more than two decades of hard-won experience. And now, in Gold Trading Boot Camp, he tells you everything you need to know when going to battle in today's volatile trading environment. Throughout history, gold has been an exceptionally safe and effective storage vehicle for the preservation of wealth. During certain periods, however, when political instability consumes headlines and intensifies investors' anxieties, gold rises to the top of the investment pyramid for its unmatched ability to create wealth relative to other investments. This lively book is packed with first-person war stories from the front lines of trading. But don't let its entertaining style fool you, because Gold Trading Boot Camp is also packed with specific detail and hands-on trading advice. This technique-driven handbook tells you which trading environments are tailor-made for building speculative wealth in gold trading, while at the same time explaining how to maximize your profitability from buying and selling gold in virtually every type of market environment. It features: A step-by-step, detailed accounting of the regimen that a successful gold trader, and any successful capital markets investor, should follow each and every trading day A complete overview of the gold market's structure — essential for making consistently profitable trading decisions in this "tightly held" market Strategies for using technical analysis and quantitative systems to accurately define significant trend reversals, major pivot points, continuation and correction patterns, and trend acceleration sequences An overview of the macro-fundamentals that pinpoint the most pertinent economic indicators and information sources available. The author has crafted an approach that slices through today's overwhelming amount of data-noise and empowers you to make faster and more informed investment decisions Market-proven methods for identifying trends, trading on momentum, and profiting from the natural movements of the market A valuable reference library of long-term charts that accurately reflect the historic performance of gold and precious metals markets relative to other asset classes Today's global-macro environment presents numerous chances to extract profits from the precious metals market — more than we have seen in nearly three decades. With the fast-paced and well-researched Gold Trading Boot Camp as your guide, you'll enter Greg Weldon's Boot Camp and discover how to take profitable advantage of this once-in-a-lifetime investment/trading opportunity.
