**From Elsevier Science : Handbook of Management Accounting Research: 1 (Handbooks of Management Accounting Research)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Handbook of Management Accounting Research: 1 (Handbooks of Management Accounting Research):

Volume one of the Handbooks of Management Accounting Research sets the context for both Handbooks, with three chapters outlining the historical development of management accounting as a discipline and as a practice in three broad geographic settings. The bulk of the first volume then draws together a series of contributions that analyse the scholarly literature in terms of distinct intellectual and theoretical social science perspectives. The volume includes a chapter which looks at work informed by psychology as a base discipline. The volume also includes a set of chapters that seek to evaluate and explain issues of research method for the different approaches to research found within management accounting. Special pricing available if purchased as a set with Volume 2. Documents the scholarly management accounting literature Publishing both in print, and online through Science Direct International in scope

"The Handbooks of Management Accounting Research represent an ambitious and important project to pull together the main streams of modern research in this vitally important area. Anyone who is interested in using management accounting theory to understand or improve practice should study these handbooks carefully." --Professor Roberts Simons, Harvard Business School, USA About the Author Christopher Chapman, having previously researched the ways in which people work to make accounting relevant to operational decision making in a variety of contexts including restaurants and professional service firms, currently studies the design of cost systems for healthcare providers. He is an editor of "Accounting, Organizations and Society" and is the President of the European Institute for Advanced Studies in Management
