William J. Ward : Health Care Budgeting and Financial Management for Non-Financial Managers before purchasing it in order to gage whether or not it would be worth my time, and all praised Health Care Budgeting and Financial Management for Non-Financial Managers:

3 of 3 people found the following review helpful. Read the book took his class: nothing particularly insightfulBy Sean A.I'm not a business person, but I took Mr. Ward's class and read (most of) his book. There was nothing that I found particularly insightful in here, besides the basic accounting practices that are used in the healthcare field. Good introduction, but almost no depth and the writing is not always that clear. If you need it for a class, it is not a bad book, but I wouldn't buy it just because.0 of 0 people found the following review helpful. easy read.By EG123Detailed and thorough; easy read.0 of 0 people found the following review helpful. Perfect condition.By KelidItem was as expected. New. Perfect condition.

The basic premise of this book is that health care non-financial managers need to understand enough about financial management to be successful in their day-to-day activities while not being smothered with details. Ward provides managers with a basic level of financial management principles, including understanding financial statements and ratios, preparing an operating budget, and using financial analysis to help with decision making.Written in plain English, the text is interspersed with illustrative cases and examples gleaned from more than twenty years of experience in both operational and financial areas and in both staff and management capacities. The text is sophisticated enough to be used by graduate students and practitioners as well as undergraduate programs in health services administration. It is also suited for independent study by professionals seeking to enhance their professional development. Lastly, it is useful as a day-to-day reference for managers in all fields in health care.

About the AuthorWILLIAM J. WARD, Jr., is Vice President-Operations and Secretary, The Francis Scott Key Medical Center, Baltimore.
