**From Palgrave Macmillan : Industrial Design, Competition and Globalization** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Industrial Design, Competition and Globalization:

Economic activities are becoming increasingly globalised. One result being that for companies in developed market economies price-based competition is being replaced or supplemented by other forms of competitiveness. This book explores the shift towards design-based competitiveness and the escalation in the design-intensity of goods and

services.
