From Routledge : International Approaches to Real Estate Development before purchasing it in order to gauge whether or not it would be worth my time, and all praised International Approaches to Real Estate Development:

0 of 0 people found the following review helpful. Five StarsBy Derek HoThis book provides a comprehensive and critical review of the real estate development practices round the world.

An international approach to the study and teaching of real estate is increasingly important in today's global market. With chapters covering numerous countries and every continent, International Approaches to Real Estate Development introduces real estate development theory and practice to students and professionals in the comparative international context. The book provides readers with a global compendium written by an international team of experts and includes key features such as: Chapters covering: the United States; United Kingdom; Netherlands; Hungary;

United Arab Emirates; Bahrain and Qatar; Ghana; Chile; India; China; Hong Kong; and Australia
An introduction providing theory and concepts for comparative analysis
Discussion and debate surrounding international real estate development in its approach, characteristics, geography, implementation and outcomes
A concluding chapter which brings together comparative analyses of the different real estate development case study findings
Reflections on the global financial crisis and the new real estate development landscape
Further reading and glossary
The wide range of case studies and the mix of textbook theory with research mean this book is an essential purchase for undergraduate and postgraduate students of real estate, property development, urban studies, planning and urban economics.

"[T]his book provides a wide spectrum of real estate development approaches in a range of markets, which can be viewed through an institutional lens to understand the linkages in "environments, markets, agencies, processes and outcomes". It is an important reference source for students and researchers, and paves the way for stimulating further comparative research, particularly between the global south and global north." ndash; Piyush Tiwari, Construction Economics and Building, University of Melbourne, Australia
