International Finance is a complete and authoritative text on the theory and practice of finance in the international arena. Features include: A user-friendly approach to a complex topic which moves from the basics to the advanced with clarity and conciseness. A strong European orientation which gives it an approach that is singular in its focus. Opportunities for students to assess their progress with multiple choice questions, end-of-chapter questions and answers, exercises, and glossary. Coverage of current issues and up-to-date material on credit default swaps, the financial crisis of 2007 / 2008, sovereign debt crises, and the carry trade. Financial Times press cuttings on selected controversial issues drawn from actual vignettes by top FT journalists.
